BARR'S "PURE" GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, Pleasure Grounds, etc.

Renovate Lawns, etc., in September, after the wear and tear of Summer. For renovating, 20 to 30 lbs. of Grass Seed are required per acre.

The following mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There are neither Clover nor coarse grasses in the mixtures.

To ensure a fine lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses.

In sowing grass seeds always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil ; this, followed by rolling, when the soil is sufficiently dry, will ensure a successful vegetation. After this, frequent cutting and constant rolling will be necessary to have a fine smooth lawn.

No. 1. Thames Embankment Lawn Grasses, this special mixture has been very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb., 1/4 ; per 10 lbs., 12/9 ; per 20 lbs., 24/ ; per 56 lbs. and upwards, at the rate of 1/2 per lb.

No. 2. Fine Lawn Grass Mixture for Improving Old Lawns or Laying Down New Ones, Croquet Grounds and Bowling Greens, in this mixture there is a larger quantity of small grasses than in No. 1, per lb., 1/5 ; per 10 lbs., 13/6 ; per 20 lbs., 26/ ; per 56 lbs. and upwards, 1/3 per lb.

No. 3. Extra Fine Lawn Grass Mixture for Improving Old Lawns, or Laying Down New Ones, Croquet Grounds, and Bowling Greens, this is a specially fine mixture of dwarf growing grasses only, which makes a finer, closer, and smoother turf, and does not require to be so often mowed as Nos. 1 and 2 ; it is specially adapted for select lawns. 1/9 per lb. ; per 10 lbs., 16/6 ; per 20 lbs., 31/ ; per 56 lbs. and upwards, 1/6 per lb.

No. 4. Barr's New Mixture of Dwarf Growing Grasses, specially recommended, *when an extra fine, smooth lawn is required ;* the grasses are of the finest leaved kinds, and dwarfest growers, so that in using this seed a great saving is effected in mowing, besides having a **perfect lawn.** Per lb., 2/ ; per 10 lbs., 19/ ; per 20 lbs., 37/ ; per 56 lbs. and upwards, 1/10 per lb.

Dutch Clover, Finest White, if Clover is desired, it may be added to the Grass Seeds, at the rate of 3 to 5lbs. per acre. Per lb. 1/6.

HOW TO DESTROY WEEDS ON LAWNS.

WATSON'S WEED-DESTROYING LAWN-SAND will kill daisies, dandelions, plantains, etc., on Lawns, Croquet Grounds, etc., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Price for sample canister, 2/6 and 5/6 ; per ¼ cwt. 9/6 ; ½ cwt., 18/ ; 1 cwt., 34/.

THE BEST FUNGICIDE, AND MOST EASILY APPLIED (*full particulars on application*).
TAIT AND BUCHANAN'S ANTI-BLIGHT POWDER, in 1/, 2/9, 5/6, 10/6, and 18/ quantities.

IN USE IN

THE ROYAL GARDENS

THE ONE THING NEEDFUL.

BARR & SON, 12 & 13, King Street, Covent Garden, LONDON.

Ichthemic Guano

The Chrysanthemum and its Growth.

Ichthemic Guano,

Mr. [illegible] Ichthemic Guano, *April 22nd*, 1889.

Ichthemic Guano

"Ichthemic Guano," as the name implies, is a preparation from fish

Ichthemic Guano to be

GENERAL DIRECTIONS FOR USE.

THIS most valuable Manure can be applied dry; a small quantity should then be scattered round each plant, and carefully stirred into the soil with a fork or rake. When used in this way one or two ounces may be put on the Garden per square yard of ground. The best way to use it, especially with window and frame plants, is, however, to mix one tablespoonful of the Guano with one gallon of water, stir well the mixture and apply it to the roots with a watering pot about three times a week.

For Vines, three or four times the above quantity may be advantageously employed; during growing, and especially at the time of stoning, the solution only should be applied, say four tablespoonfuls to the gallon of water; but in the earlier stages of growth it is best to apply the Guano in its dry state, at the rate of about half-a-pound to the square yard.

For Chrysanthemums, Azaleas, and other shrubs, this Guano is the best plant food known. Either mix it in its dry state with the soil before potting (1 part in 100) or use it as a top dressing, or in a solution of one tablespoonful to the gallon; Chrysanthemums are especially remarkable for quickness in absorbing the properties of the Guano, and they may be fed with it freely.

For Roses apply the solution (one tablespoonful to the gallon of water) beginning at the latter end of the year.

For Bulbs and Ferns, use the Guano as a liquid manure only.

For Orchids, mix in its dry state when potting, and afterwards use the solution, or dissolve in shallow pans of water and allow it to evaporate.

For Primulas, Geraniums, Fuchsias, Cinerarias and similarly rooted plants, the solution only should be applied after potting, the Guano in its dry state being used mixed with the soil before potting or planting out (1 part Guano to 100 parts soil).

For Violets. To secure Violets from October to March, mix lightly with the soil before planting, afterwards use in a liquid or dry state.

For Vegetables and Fruit one cannot do better than follow the general directions given above. On the ground where it is intended vegetable seed should be sown, use one or two ounces per square yard as a top dressing, afterwards rake in, and if the crop is found to require further stimulant apply between the rows in the same way.

For Lawns and Grass apply as a top dressing, one or two ounces per square yard. Distribution over the surface should be as even as possible.

In all outdoor application the Guano is best used when there is a likelihood of rain or in showery weather; if hand watering is practicable so much the better.

CAUTION.—*Care must be taken to use no more than the prescribed quantity; carelessness in this respect has sometimes led to injurious results.* TO BE KEPT DRY.

BARR & SON, 12 & 13 KING STREET, COVENT GARDEN, LONDON.

ENTERED AT STATIONERS' HALL.]

SPECIAL NOTICES.

I. **Quality.**—When the **Bulbs** in Holland are in flower, we annually make a professional visit to the principal "bulb farms" to inspect the crops, and our supply of Dutch-grown bulbs is drawn from the **healthiest "stocks"** of the **most reliable growers**; we can therefore recommend them with the utmost confidence, and feel sure that if the bulbs receive proper cultural treatment they will give great satisfaction. *Simple and practical cultural directions head each family of bulbs, etc., in the following pages.*

II. **Experimental Grounds at our Nurseries, Long Ditton,** a few minutes from Surbiton Station, S.W.R. (close to the Surbiton New Recreation Grounds). Visitors will at all seasons find many things of interest and beauty in **Hardy Bulbs, Tubers and Herbaceous Perennial Plants.** In spring the brilliancy of our new Daffodils, Chionodoxas, Anemones, etc., surpasses description. From August to April one variety or another of our unique collection of rare **Species of Crocus** may be seen in flower, and in September and October there is a gay display of beautiful varieties of **Meadow Saffrons.**

III. **Parcel Post.**—We shall in all cases use the **Parcel Post,** *when cheapest,* and the articles ordered weigh under 11 lb., and admit of being packed for safe transmission by "*Parcel Post.*"

IV. **Carriage by Rail** may be deducted at settlement of account, on orders for Bulbs to any Railway Station in Great Britain, and to all ports on the Irish Coast (except goods coming under Clause VII.).

V. **Orders, paid in advance.**—Carriage in all such cases will be prepaid.

VI. **Returned Empties.**—A small charge is made for these, and if returned within a fortnight, allowance will be made for the same. *Returned empties should invariably have the sender's name on the address label for the identification of sender, and a notification be sent by post stating date of dispatch and name of Railway Company,* that we may see that the empty is duly received.

VII. **Fruit and Forest Trees,** Shrubs, Plants in pots, Soils, Watson's Lawn Sand, Manures, Anti-Blight, and Insecticides—on these we do not allow carriage.

VIII. **Five per cent.** may be deducted from accounts if paid within one month from date of invoice.

IX. **Money Orders and Postal Orders** to be made payable at Covent Garden Post Office; these and all cheques should be crossed, "London and County Bank." Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

X. **Daffodil Catalogue.**—The annually increasing importance attached to Daffodils for forcing, and as cut flowers, also for out-door decoration in beds, borders, and to naturalize in grass, has necessitated the issue of a special "**Daffodil Catalogue,**" and to this we have added short lists of our well-known collections of "**English Amateur**" **Tulips, Irises, Double and Single Pæonies, Christmas Roses, Lenten Roses, Lilies, Michaelmas Daisies, Perennial Sunflowers, Phloxes, Day-Lilies, Plantain-Lilies,** and a few other specially beautiful **Hardy Herbaceous Plants. Barr's Old English Tulips,** to these the R.H.S. awarded, May 9th, 1893, a **Silver Flora Medal,** and May 25th, 1893, at the Temple Show, a **Silver Cup.** See page 13.

XI. ☞ **Naming Daffodils.**—Cut specimens of Daffodils we undertake to name correctly at the charge of 6*d.* each, 2*s.* 6*d.* per dozen, 15*s.* per 100, to cover attendant expenses. Address all cut specimens for naming, accompanied by a remittance, to our *Nursery, Long Ditton, Surrey.*

XII. **Cut Daffodil Flowers.**—When in bloom out-of-doors, cut specimens of our Daffodils, correctly named, we forward post-paid at a minimum charge to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of spring. *Fees will be found under Special Notices, Daffodil Catalogue.*

XIII. **Medals, Certificates,** &c.—The Royal Horticultural Society, for many years past, have annually awarded to us, for our Exhibitions of Beautiful New Daffodils, &c., **Gold Medals, Silver Medals, Silver Cups,** &c., with numerous Votes of Thanks, and many **First Class Certificates.** At the Second Great Daffodil Conference of the R.H.S., held from 15th to 18th April, 1890, our Grand Display of **New Daffodils** was awarded the ONLY GOLD MEDAL. Many **Medals, Prizes and Certificates,** have also been awarded to our **Beautiful Hardy Daffodils,** &c., at the ROYAL BOTANIC GARDENS, CRYSTAL PALACE, ROYAL AQUARIUM, EARL'S COURT EXHIBITIONS, &c., at whose large London Spring Shows **Barr's Daffodils** are always a great attraction. The awards received for 1894 have been SIXTEEN MEDALS and FIVE CERTIFICATES.

At the Birmingham Daffodil Show, held April the 18th, 1894, we were Awarded a Silver-Gilt Medal (*Highest Award*) for our Exhibit, and the Premier Prize for the Finest Daffodil Exhibited.

Barr's Daffodil Silver Cup will be the great prize of 1895, *see Daffodil Catalogue.*

Barr's Daffodil Prize Medals to be Awarded, Spring, 1895, *see Daffodil Catalogue.*

Barr's "English Amateur" Tulip Prize Medals to be Awarded, 1895, *see Daffodil Catalogue.*

NOTICES TO OUR FOREIGN AND COLONIAL CORRESPONDENTS.

XIV. To insure prompt attention, *orders should be accompanied by a remittance, a draft, or an* "order to pay," on a London agent; the remittance being sufficient to cover expense of cases, and also of carriage when the freight is required to be paid in advance.

XV. SEEDS AND BULBS can now be despatched in hermetically sealed cases to India at the rate of 8d. **per lb.,** through the **Indian Parcel Post,** or by "**Express**" to the nearest port or railway station at a lower rate.

XVI. **In shipping Bulbs and Plants** to India and the Colonies, great care is exercised by us in selecting, preparing, and properly packing the same. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which plants or bulbs reach their destination.

XVII. Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies, extends over a long period.

[*Barr and Son,*

A FEW NOVELTIES AND SPECIALTIES.

		s.	d.
170	**Albuca Nelsoni**, a most beautiful Cape bulb for south borders, bearing in June handsome spikes of almond-scented flowers, *pure white*, with *brown* stripe, or if grown under glass all *white*, doz. 15*s.*; ea.	1	6

BARR'S BEAUTIFUL "RAINBOW" MIXTURES OF HYACINTHS.

FOR OUT-DOOR CULTURE IN BEDS, BORDERS, ETC.

282 **"BARR'S BEAUTIFUL 'RAINBOW' MIXTURE OF HYACINTHS,"** this beautiful mixture of Hyacinths was specially arranged for by our Mr. Barr on the occasion of his visit to one of the large Dutch Bulb Farms in Holland. The colours are evenly blended, including *red*, *scarlet*, *purple*, *lavender*, *porcelain*, *azure-blue*, *white*, *rose*, *blush*, *yellow*, &c., producing a magnificent effect in flower beds and borders .....1st size bulbs, per 100, 18/6 ; per dozen 3 0

283 **"BARR'S BEAUTIFUL 'RAINBOW' MIXTURE OF HYACINTHS,"** for mixed borders, shrubberies, and naturalization .....2nd size bulbs, per 100, 14/6 ; per dozen 2 3

POMPON, OR MINIATURE HYACINTHS.

These Miniature Hyacinths can be grown in small glasses, fancy pots, old china bowls, crystal dishes, jardinets, etc., alone or associated with Scilla sibirica, Chionodoxas, Crocus, Snowdrops, Dwarf Tulips, and Daffodils, Iris reticulata, etc. Plant them in "*Barr & Son's Prepared Mixture of Charcoal and Cocoa Fibre*" (*1s. 6d. per peck*, *5s. per bushel*); the surface may be covered with fresh green carpet-moss till the plants appear.

In *children's gardens* and small flower beds, these Miniature Hyacinths alone or intermingled with other dwarf spring-flowering bulbs, make a fine display throughout the Spring months.

ROMAN HYACINTHS AND NARCISSI for Early Forcing.

CULTURE.—Pot the bulbs 3 to 6, or more according to size, in a 4 or 5 inch pot, during August, September, and October; then place the pots out-of-doors on a bed of ashes, and with cocoa-nut fibre cover the pots a few inches. There let them remain till the bulbs are well rooted, and have made a little top growth; the pots should then be removed, a few at a time for succession, to a moderately warm and *moist* temperature, and plentifully supplied with water.

288 **Roman Hyacinth, Early Dwarf White Sweet-Scented**, universally prized in bouquets, and may be had in flower during October, November, and December, if treated as recommended above.
Extra large bulbs, 16*s.* per 100 ; 2*s.* 6*d.* per doz. | **Fine selected bulbs**, 13*s.* 6*d.* per 100 ; 2*s.* per doz.

289 **Roman Hyacinth, Early Blush** } *A little later than* No. 288, *and with larger spikes, very sweet-scented.* } 10*s.* 6*d.* per 100 ; 1*s.* 9*d.* per doz.
290 **Roman Hyacinth, Early Rose** }

291 **Roman Hyacinth, Early Blue**, *flowers from a fortnight to three weeks later than the White Roman Hyacinth*, 10*s.* 6*d.* per 100; 1*s.* 9*d.* per doz.

292 **Narcissus, "Early Snowflake" Paper White, Sweet-Scented**, fine large free-flowering variety of Paper White Narcissus, in bloom with the Roman Hyacinth, if treated in the same way, 10/6 p. 100; 1/9 p. doz.

293 **Roman Narcissus, Early Double**, in flower with the Paper White Narcissus, if treated in same way, blossoms double white, with orange centre, in trusses, valued for bouquets and buttonholes, 5/6 p. 100 ; 1/ p. doz.

BARR'S CHOICE NAMED HYACINTHS.

FOR CULTURE IN GLASSES, JARDINETS, POTS, AND FOR EXHIBITION.

☞ **The * indicates the Hyacinths with large flower spikes and single or semi-double blossoms, which we specially recommend for early forcing in pots, and for growing in glasses, jardinets, &c.**

The † denotes the varieties with double blossoms. These are not so suitable for growing in glasses and jardinets, or for forcing. Those enumerated are a selection of the finest double-blossomed varieties in cultivation, and we recommend them for pot culture.

CULTURE.—**Immediately the Hyacinth is potted,** which may be done from September to December, *place the pots out of doors on a bed of ashes,* and cover with six inches of the same material, but a covering of cocoa fibre is preferable if it can be had; the bulbs should there remain exposed to all weathers until the pots are full of roots, and the tops are sprouted about an inch, which will be in about eight or ten weeks after potting. They may then be removed indoors, and *if forced, this should be done gently* in a moist airy atmosphere, and the bulbs plentifully supplied with water at the roots. To maintain a succession, arrangements should be made before covering for a portion to be removed indoors once a fortnight. **If finely developed trusses and rich colours are preferred** to *very early flowers,* the **Hyacinth** should remain longer out-of-doors and **not be forced,** but when removed indoors, the pots should be placed in a mild temperature such as that of a greenhouse, a sitting-room window, or a frame, keeping the plants close to the glass, and always in the most genial and sunniest situation, so that the plants develop their flowers gradually and naturally, *water being given regularly and freely,* as it is well known to professional cultivators that *failures,* for the most part with Hyacinths, arise from allowing the *soil to become dry.* Abundance of air is necessary, as also a moderately *moist atmosphere;* a dry or frosty atmosphere and a draughty situation will cause the *flower buds to shrivel.*

If the Hyacinth is grown in glasses, the *base of the bulb should just touch the water,* and a little charcoal placed in the glass to keep the water sweet. It is, however, preferable to fill the glasses with the prepared *Mixture of Charcoal and Cocoa Fibre* (see page 33 for directions). Place the glasses in a room *without a fire,* or, better still, in the shady part of a greenhouse, and when the plants have filled the glasses with roots, and have made a little top growth, then place them in the sunniest situation at command, till the flower spikes are well developed; the glasses may then be removed to where the flowers are to be enjoyed. *Avoid a dry or frosty atmosphere and a draughty situation,* as these are often causes of the flower buds shrivelling.

When cultivated in jardinets, the Hyacinth may be associated with other early-flowering bulbs, such as Chionodoxas, Scilla sibiriea, Tulips, Snowdrops, Croeuses, Narcissi, Iris reticulata, &c. *Barr & Son's prepared Mixture of "Charcoal and Cocoa Fibre"* should invariably be used (see page 33 for directions); the preparation must always be kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss.

BARR'S CHOICE NAMED HYACINTHS.

The varieties of Hyacinths described, and included in the selections offered, are those which we have personally selected during our many visits of inspection to the bulb farms of Holland, and which, from experience, have proved the most worthy of cultivation. *Bulbs all of extra fine quality.*

☞ BARR'S DAFFODIL PRIZE SILVER CUP and MEDALS offered for cut Daffodil flowers, Spring 1895, particulars given under Special Notices, in Daffodil Catalogue. *Prizes will also be given in* 1896.

BARR'S BEAUTIFUL HARDY DAFFODILS (Narcissi).

Bulbs Supplied September to end of December.

In our DAFFODIL CATALOGUE a detailed descriptive list of the best Daffodils will be found.

The Daffodil is the most beautiful of all hardy Spring flowers, and the most popular; it has for centuries adorned our gardens, and withstood uninjured our severest winters.

For filling beds and planting in groups in mixed borders and shrubberies, no flowers of spring can compare with **the Daffodil,** and when naturalized in woodland walks, or forming large groups in grass, or planted on sloping banks, the effect Daffodils produce is splendid. (*See page* 3 *of Daffodil Catalogue for Mr. William Robinson's experience.*)

For greenhouse decoration *the Daffodil ranks with the Hyacinth,* and when 3 to 6 bulbs are grown in a pot, the effect is very fine. **As a cut flower** the Daffodil is unsurpassed, and greatly in demand, for hand bouquets, table bouquets, vases, etc.

☞ *Supplying Cut Specimen flowers of Daffodils, correctly named, see Special Notices, in Daffodil Catalogue.*

473 **POET'S DAFFODILS, or STAR NARCISSI, IN MIXTURE,** including early and late-flowering **POETICUS,** and varieties of **BURBIDGEI** for naturalization in grass, etc. (*See what Mr. William Robinson says of the beauty of these Poet's Narcissi, when naturalized, page* 3 *of Daffodil Catalogue*). The cut flowers are much prized for their graceful beauty per 1000, 42/; per 100, 5/6; per doz. 1/0.

☞ For a list of separate kinds of Daffodils to naturalize in plantations, see Daffodil Catalogue.

POLYANTHUS, OR BUNCH-FLOWERED NARCISSI.

The **Polyanthus Narcissus** *has rich golden-yellow or snow-white* **sweet-scented** *flowers, and is specially adapted for winter and spring decoration in pots and jardinets. The effect is greatly enhanced when three bulbs are grown together in a* 6 *or* 7*-inch pot. The culture is the same as that of the Hyacinth. For flower beds and mixed borders, the* **Polyanthus Narcissi** *are great favourites.*

Where flowers are in demand in November, December, and early in January, the **Paper White** "**Early Snowflake**" *and* **Double Roman Narcissi** *are invaluable, and when forced as required, these and the Roman Hyacinths* (*see culture, page* 6) *can be had in bloom from November.*

King Street, Covent Garden, 1894.]

THE SACRED, OR GOOD LUCK LILY OF CHINA AND JAPAN.

Called by the Chinese, "Jos Flower," or "Flower of the Gods," and "Water Fairy Flower."

This is a species of Polyanthus Narcissus annually imported from Northern China, and prized for the abundance of its flowers and marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant. Each bulb usually produces several flower spikes, each bearing many flowers, and the Chinese call the best cultivated and largest developed blooms, **"Grand Emperor."** In China and Japan the bulbs are grown in the living rooms in fancy bowls filled simply with *pebbles and water*, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of "Good Luck." The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is something like 20 inches in forty days, placed in a sunny window by day, and on a table near the fireplace by night, as frost destroys the flower buds. The natural atmosphere of a warm greenhouse suits the flower well. *Fuller particulars of culture sent with the bulbs.* **Orders now booked for immediate delivery on arrival.**

SWEET-SCENTED JONQUILS.

The Double and Single Jonquils are prized for their graceful sweet-scented flowers in or out of doors. For in-door decoration three to six bulbs should be grown in a 4 or 5-inch pot, and cultivated the same as the Hyacinth in all respects, whether for early flowering or succession. If planted out-doors and treated the same as hardy Daffodils, a long succession of these sweet-scented flowers for room decoration may be maintained.

THE TULIP.

Our Single and Double Tulips were awarded **First Prize** *International Hort. Exhibition, London,* 1892.

The Tulip is extremely hardy, and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in more favoured places. Double and single Tulips, when mixed together and planted in front of shrubs, maintain a longer display than if either are planted separately. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the lines of Tulips, Scilla sibirica, Chionodoxas, Snowdrops, or Crocuses; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip.

EARLY SINGLE TULIPS.

Those alone who have massed the different varieties of **Single Tulips** (*planting the bulbs 4 to 5 inches apart*), can form an idea of their great beauty and the rich diversity there is in shade and colour, and the grand effect they produce grouped in flower beds or borders. **The Single Tulip** is extensively grown for indoor decoration (three or five bulbs in a pot), and *cultivated in the same way as the Hyacinth* for early-flowering and succession.

☞ *The varieties of the Early* **Duc Van Thol Tulip**, Nos. **538** to **543**, *flower together, and are of the same height, which renders them valuable for beds and borders, where an early Spring display is required, also for forming designs.* For early-forcing, to bloom with the Roman Hyacinth and Double Roman and Paper White Narcissi, the scarlet and yellow Duc Van Thol Tulip, No. **537**, is extensively used.

DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to Rose beds and shrubberies. Planted in groups of three or more in flower and shrubbery borders, they are very attractive.

King Street, Covent Garden, 1894.]

DOUBLE TULIPS—*continued.*

For sectional lines, where the Early Single Tulip is planted in designs, the **Tournesol**, No. **597**, being also early, is most valuable; it is excellent to force for early-flowering, and is grown extensively for Covent Garden Market. **Imperator Rubrorum** the best scarlet, **Tournsol Yellow** the best yellow for indoor decoration. These Double Tulips should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth. In beds or large masses, **Rex Rubrorum**, *scarlet*, blended with **La Candeur**, *white*, produces an unrivalled effect in the Spring flower garden. *Plant the bulbs six inches apart.*

PARROT, or DRAGON TULIPS, with Laciniated Petals (*May-flowering*).

These have large, characteristic blossoms with curiously laciniated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets, the drooping flowers look like orchids.

The varieties under name are all selected strong bulbs, and each may reasonably be expected to bloom; but as there is an unaccountable uncertainty in the flowering of these Parrot Tulips, we advise that they be not used for filling beds, but simply planted in flower borders, or naturalized.

12 bulbs each of the Parrot Tulips named below, 8s. 6d.; 6 each, 4s. 6d.

Barr's Beautiful "ENGLISH AMATEUR" Tulips.—May-flowering.

Awarded by the Royal Horticultural Society a Flora Medal, May, 1893, *and again* 1894.

Awarded at the Temple Show, the Royal Horticultural Society's Silver Cup, May 25th, 1893.

These beautiful Tulips in the South of England commence flowering according to the earliness or lateness of the season, from the first to the last week in May, and may be enjoyed for a month. The "ENGLISH TULIP" is pre-eminently an amateur's flower, and has been so for upwards of 300 years. Amateurs who may be induced to take up Tulip culture should read the following extract from the *Manchester Guardian*, 2nd June, 1892, from the pen of the late Mr. Samuel Barlow, one of the greatest authorities on "ENGLISH AMATEUR" TULIPS:—

"The best *Amateur* Tulips known to exist, or that have ever existed, have been raised in England, principally in the Northern counties—Lancashire, Yorkshire, and Derbyshire. Over forty years ago the late Dr. Hardy, of Warrington, in a series of papers to the *Midland Florist*, completely settled all the points of excellence which go to make a first-class Florist Tulip, and his definitions have never since been disputed. Since then the cultivation of Florist Tulips has much improved, especially in the three counties named, although, singular to say, it has almost died out in the South of England, where, fifty years ago, the most enthusiastic Tulip growers made London their centre for exhibitions. There are distinct evidences now of a revival of interest in *the South* of this grand old flower, and I hope that the Exhibitions of the Royal National Tulip Society will give additional stimulus to the cultivation and love for this fascinating flower."

Our Collection is large of "English Amateur" New Florists' Tulips, and, together with Old Scotch and Dutch varieties, about 20,000 bulbs will be planted this Autumn, and the flowers may be seen during May, 1895, at our **Long Ditton Nurseries,** a few minutes' walk from **Surbiton Station,** on the **South Western Rail.** A Detailed List of a select few of these "ENGLISH AMATEUR" TULIPS will be found in our Daffodil Catalogue, together with further notes and information. The assortments offered below we recommend to those about to become **"Tulip Amateurs."**

King Street, Covent Garden, 1894.]

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a prominent place in every garden. Planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or of pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses are extremely effective. For several years past in "Rotten Row," and other of the Royal Parks, Crocuses, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors, and the enhanced decoration of the parks. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

CHEAP DUTCH CROCUSES, FOR LARGE PLANTINGS.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, etc., Crocuses are quoted by the thousand cheaply. For a gorgeous effect in early spring nothing can equal the **Golden Yellow Crocus**, masses of which will attract the eye at a great distance.

CHOICE NAMED LARGE-FLOWERED DUTCH CROCUSES. Large Roots.

The following large-flowered named Crocuses are recommended for planting in groups, edgings, select beds, and in designs. There are purples and blues of shades, pure whites, rich yellow, light and dark striped sorts, &c. When the crocus is grown in pots, plant thickly, and treat as recommended for the cultivation of the Hyacinth, on page 7. When removed from under the asbes, place in an airy situation, and give water very freely. A charming effect is obtained by growing Crocuses in shallow saucers of water (the bulbs touching one another), and this may be accomplished in an ordinary sitting-room.

AUTUMN, WINTER, AND SPRING-FLOWERING SPECIES OF CROCUSES.

Our collection of these Crocuses consists mostly of wild species, many of which were collected by George Maw, Esq., in Greece, Syria, Palestine, etc. ; they cannot fail to be acceptable for rockwork and other select places, where they may be seen to advantage.

[*Barr and Son,*

SNOWDROP (Galanthus Nivalis, etc.)

In the early Spring months, there is nothing more beautiful than a sheet of the **snowy graceful blossoms of the Snowdrop.** In planting an edging, mass, or a bed, whether in the turf of the lawn or in the flower garden, the bulbs should almost touch each other. A bed of surpassing beauty may be arranged, Snowdrops in the centre, with a deep fringe of bright blue **Scillas sibirica** or **bifolia, Chionodoxa Luciliæ, C. sardensis,** or **C. gigantea**; a charming effect is also produced by intermingling in the proportions of two-thirds Snowdrops to one-third **Scillas** or **Chionodoxas.** When practicable such plantings of the Snowdrop should be permanent, and the surface of the soil in Summer top dressed and sown with annuals, such as Nemophila, Leptosiphon, etc., or planted with surface rooting bedding plants. The **Snowdrop** and the **Crocus** when planted in alternate circles are very effective, and follow each other so closely, that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just moving the surface, and when the flowers are over there remains an elegant groundwork of green foliage, or if the foliage is not desired, it can be cut down close to the soil.

The Snowdrop is most generally used for permanent edgings and masses, though in the fringes of lawns, where the grass need not be cut till May, and in pleasure parks, nestling in the grass, it looks, perhaps, most at home. In planting in grass, the turf need not be disturbed, but holes about three inches apart and five inches deep should be made with a dibber, dropping in three inches of fresh soil, then three or more bulbs. **Snowdrops** when planted on banks and grass slopes, look lovely. *The New Giant Single Snowdrop,* **Galanthus Elwesii,** *should be extensively used; its flowers are large and valuable for cutting.* The Chionodoxas are charming companions to Elwes' Giant Snowdrop; indeed, both are found growing wild together, and as Nature is never found out of harmony, the information may be suggestive to those who desire to follow her guidance in intermingling these early spring beautics.

CHIONODOXA (Glory of the Snow).

The Chionodoxa is now so widely known and appreciated, it appears almost superfluous to say anything in its praise. The bulbs are now very cheap, and as Mr. William Robinson in his paper at the Conference on Hardy Flowers recommends it for naturalizing, we may just add we feel sure that, naturalized, the Chionodoxas will afford lasting pleasure. The species offered are gems amongst spring flowers.

Chionodoxa Luciliæ (*The Glory of the Snow*), the most beautiful of all dwarf blue spring-flowers, and unsurpassed for edgings and masses in flower borders and on rockwork; colour *deep Nemophila-blue, with clear snow-white centre.* Mr. George Maw, in describing the circumstances under which he found the Chionodoxa Luciliæ, says, "*At the lower level it was out of flower, but near the summit of the mountain a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of* **blue and white,** *resembling Nemophila insignis in colour, but more intense and brilliant." Had Mr. Maw seen C. sardensis and C. gigantea, we feel sure he would have been filled with perhaps even greater enthusiasm.* The Chionodoxa Luciliæ was figured in *The Garden,* July 3rd, 1880, and in 1878 the Floral Committee of the R. H. S. awarded to our specimens a **First-Class Certificate.**

743 **Chionodoxa Luciliæ, Fine Home-grown Bulbs** ..... p. 1000, 30*s.*; p. 100, 3*s.* 6*d.*; p. doz. 6*d.*
744 ,, ,, ,, ,, ,, **extra selected** ,, 40*s.*; ,, 4*s.* 6*d.*; ,, 8*d.*

Chionodoxa sardensis, introduced by us in 1883. A First-Class Certificate was awarded to our plants, 1885, by the R. H. S., also by the Royal Botanic Society. *The Garden* of 14th March, 1885, refers to it thus:—"*Chionodoxa sardensis is a gem among spring bulbs—one of the* **rare really blue** flowers. A good sized patch is *strikingly brilliant,* the petals are coloured nearly to the centre." The deep gentian blue of this flower renders it so striking that for distant effect it cannot be too highly recommended.

WINTER ACONITE.

Early in Spring the *golden blossoms* of the **Winter Aconite**, resting on its *emerald-green cushion of leaves*, are very beautiful and effective, especially when associated with Snowdrops, Early Scillas, Chionodoxas, Anemone fulgens, Anemone Apennina, etc. The green carpet produced by the foliage of **Winter Aconite** remains long after the flowers have disappeared, and this enhances the value of the plant, especially in situations where it is difficult to clothe the ground, such as **under trees and in moist situations**, which the Winter Aconite enjoys, and where few other flowering plants will thrive. It is a good useful plant to naturalize in grass, etc.

SNOWFLAKES (Leucojum), Spring, Summer, & Autumn-Flowering.

Leucojum *Vernum*, the **Spring Snowflake**, is one of our earliest Spring flowers with blossoms resembling a large Snowdrop, handsome in outline, and prized for bouquets. L. *Æstivum* and *Hernandezii*, the **Summer Snowflakes**, flower in April and May, and are remarkable for their elegant blossoms, which so closely resemble a Snowdrop as not to be distinguishable from it when used in bouquets. L. *Autumnale* is a charming white, pink-tipped Snowdrop-like flower, blooming in August and September. L. *trichophyllum var. grandiflorum*, resembles *Autumnale* in its graceful growth, but the flowers are pure white and are produced in spring; this is a very rare plant, and is figured in *Bot. Register*, vol. vii., page 544; in its native habitat it is found growing in pure sand. Mr. William Robinson, in his paper at the Conference on Hardy Flowers, remarked:—"The early-flowering Leucojum is a more precious flower for gathering than the Snowdrop, and the late-flowering Leucojum is graceful and handsome in grass."

SCILLAS, Early-Flowering.

The effect in early Spring can hardly be over-estimated of the intense rich hyacinth-blue of **Scilla sibirica**, and the beautiful ultramarine-blue of **Scilla bifolia**, contrasting with the snow-white of the Snowdrop and the varied hues of the Crocus. As permanent edgings these two early-flowering Scillas are most valuable. Grown in pots or jardinets, alone, or with other bulbs, they form a pleasing variety amongst indoor plants. In flower beds and masses, the blossoms are so abundantly produced as to carpet the ground. **Bifolia** is the first in bloom, and is closely followed by Sibirica. *All suitable for naturalization and permanent flower borders.*

SCILLAS, May-Flowering (Wood Hyacinths).

The **Wood Hyacinth** is the most decorative of May-flowering bulbs. Our native species, **Scilla nutans**, abounds in most parts of the country, and many suppose it to be the "Culver keys" referred to by Izaak Walton. The fine Spanish varieties (*S. campanulata*) of the Wood Hyacinth which we offer, have erect flower spikes and are much larger and handsomer than our native plants, which have drooping flower spikes. All the **Wood Hyacinths** are very effective in flower and shrubbery borders, and most valuable for wild gardens, woodland walks, and to naturalize. They also make charming pot-plants, and may be forced into bloom by March. **The white varieties** are greatly in demand to cut for table bouquets and vases. *Mr. William Robinson, in his paper at the Conference on Hardy Flowers, refers to the Spanish Scillas (S. campanulata vars.) as "giving new aspects of flower life." In addition to these we recommend Nos.* 783 *and* 784.

LILY OF THE VALLEY. *For forcing, and making plantations out-of-doors.*

The **clumps** of Lily of the Valley quoted, have been specially prepared, and cannot fail to give abundance of flowers. In potting, the top of the crowns should be one inch below the rim of the pot; *tight potting* is of great importance, and care should be taken, in the *first watering*, that the moisture penetrates to the *centre of the clump*. Prepared crowns are now extensively used by the growers for Covent Garden Market, who put 20 to 30 in a 5-inch pot. The **Berlin Crowns** are the best for very early forcing. The prepared clumps we think will be found by private growers preferable to crowns. The supply of **Extra Selected Clumps** being limited, orders should be booked early, *for dispatch in November.*

CULTURE.—A *moist atmosphere and abundance of water* is indispensable to success in forcing Lily of the Valley; therefore, to encourage simultaneously the development of flower and foliage, most growers place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, then they are removed to a less shady situation. If they are grown in a dry atmosphere, or get *an insufficient supply of water at the roots*, the crowns, technically speaking, "go blind."

NATURALIZATION.—The Lily of the Valley is admirably adapted for this purpose, and the Dutch Crowns will be found the best.

		each—s.	d.
811	**Extra strong selected clumps**, p. doz. 12/	1	3
812	**Strong Berlin Crowns**, for early-forcing, per 100, 6s.; per bundle of 25, 2s.

DIELYTRA (LYRE FLOWERS). *For forcing, or planting out.*

The most elegant of all forced plants for conservatory and room decoration, also to cut for furnishing vases. The graceful pendant branches are loaded with beautiful rosy crimson heart-shaped flowers, and furnished with the most delicate rich green foliage. In **shrubberies or herbaceous borders,** few plants in summer are so attractive as the Lyre Flower.

815	**Spectabilis alba,** *white*, 2 ft.	1	6

SPIRÆA (THE MEADOW SWEET). *For forcing, or planting out.*

The large graceful, feathery, pure white, fragrant flowers of **Spiræa japonica** and the new variety **compacta multiflora** surpass all else in this way to cut for furnishing vases, while the plants are amongst the most decorative for the conservatory and room. In forcing, a *moist atmosphere* and *abundance of water* is necessary. **Spiræa palmata** has feathery clusters of lovely rosy crimson blossoms, which for vases are greatly prized. **Spiræa japonica fol. aureo-reticulatis** is a most handsome and ornamental plant, and forces as easily as S. japonica. In *sheltered moist borders out of doors* these plants are very decorative.

		each—s.	d.

For other Species of Spiræas, see PLANT CATALOGUE.

IRISES.

Irises are the "Orchids" of the flower garden. Their blossoms are the most rich and varied in colour of hardy plants; their time of flowering ranges from Christmas to August. They should be extensively planted in flower and shrubbery borders, and naturalized. As cut-flowers Irises are most valuable, competing in richness and variety of colour with the choicest and the most beautiful Orchids. **For Beautiful Bearded and Beardless Flag Irises, also Japanese Flag Irises,** *see Daffodil Catalogue.*

All the Irises are admirably adapted for cutting, and when it is necessary to forward the flowers to a distance, gather when the buds are colouring and just before expanding, as they open freely in water.

ENGLISH IRIS (THE LARGE FLOWERED BULBOUS IRIS OF THE PYRENEES).

Bulbs supplied September to December.

These magnificent Irises thrive best in a well-drained light or medium soil; when the soil is very heavy surround the bulbs with sand and see well to drainage. When convenient plant as soon after the beginning of September as possible. We have planted as late as December, and even in January; but the earlier the planting is done, the greater the success. The varieties offered have been specially selected from several of the largest and best collections, as being the finest and most distinct, and will be found as *strikingly beautiful and varied in colour as the most sumptuous orchids of the hot-house.* They flower in June, thus succeeding the Bearded Flag Irises.

☞ **Our Annual Exhibits** of cut flowers of these grand Irises, at the London Summer Shows, attract much attention and elicit great admiration.

SPANISH IRIS (THE ORCHID-LIKE BULBOUS IRIS OF SPAIN). *June-flowering.*

Bulbs supplied September to December.

The Spanish Irises are in flower a fortnight before the English, and differ from them considerably, the flowers being smaller, and the arrangement of colours quite different. The curious and charming blendings of shades in the same flower give them the appearance of rare orchids, which in grace and beauty they quite equal. The cut flowers are greatly prized for vases and bouquets. *Cultural treatment same as for the English Iris.* As pot plants they are most valuable, and will bear gentle forcing. See Coloured Plate in *The Garden,* 1881.

[*Barr and Son,*

SPANISH IRIS—*continued.*

VARIOUS BEAUTIFUL
BULBOUS AND TUBEROUS-ROOTED IRIS SPECIES.

These Iris Species are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species would be more enjoyed if planted on rockwork, there the flowers would be a little protected from heavy rains. *Alata, Reticulata Histrio* and *Histrioides, Vartani*, and *Stylosa vars.*, are charming winter-flowering species, followed in February by other *Reticulata varieties*, which have lovely violet-scented blossoms, the sweet-scented *Persica*, the beautiful new species *Rosenbachiana, Kolpakowskiana, Bakeriana*, and *Danfordiæ*. Next in succession come the interesting *Cancasica, Orchioides*, the curious Snakeshead Iris *Tuberosa*, and the new species *Sindjarensis*. These are followed closely by *Susiana, Iberica*, etc., with their large handsome beautifully netted flowers; along with these Iris, *Atrofusca, Atropurpurea, Bismarckiana, Gatesii, Lorteti, Lupina, Mariæ*, and *Suworowii*, surpass in beauty and interest any written description that can be given of them. The charming dwarf Iris *Arenaria flavissima*, the pretty Peacock Iris, and the beautiful Iris *cristata*, flower in May, and are followed in June by *Iris Juncea, Boissieri, Lusitanica*, and *Tingitana*.

The Irises marked * belong to the **Oncocyclus** and **Regelia** Sections, and require special treatment. The roots should be planted in November (the tops not more than two inches below the surface) in a light rich *well drained* soil, which has been previously well dug. Cover with three or four inches of straw, which remove in March, and until in bloom encourage a free growth. Immediately the flowering is past place over the plants a light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain. Keep the glass on till October. The object to be attained is that the roots shall thoroughly ripen and be prevented from starting into growth before Spring. The light covering in winter keeps off heavy rains, and prevents a too premature growth. By following the above plan the roots can remain undisturbed for several years, which is found to suit the plants better than lifting annually. *The great beauty of these Irises, especially when seen in established masses, will fully repay the special treatment they ask for.*

For an interestng history and description of the various **Oncocyclus** and **Regelia** Irises, see Prof. Foster's article in *Garden*, February 18th, 1893. The Rev. Henry Ewbank, Isle of Wight, has met with great success in growing these Irises on raised beds (*for full particulars, see "Garden," May 13th*, 1893). (*A Beautiful Coloured Plate of Oncocyclus Irises*, **Gateeii**, **Lorteti**, and **Lupina**, can be had for 6*d*. *Another Coloured Plate of Irises*, **Atrofusca**, **Bismarckiana**, **Atropurpurea**, and **Mariæ** for 6*d*.)

King Street, Covent Garden, 1894.]

☞ **For Beautiful Flag Irises, Tall Bearded, Dwarf, and Japanese, see Daffodil and Plant Catalogues.**

{Barr and Son,

IXIAS, MORPHIXIAS, SPARAXIS, TRITONIAS, AND BABIANAS.

CULTURE IN-DOORS.—From September to January plant in a four or five-inch pot five or six bulbs, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, and at first give sparingly. When the plants are in growth, the lights should be left off, except during wet or frosty weather. Early in February, or when the plants have made sufficient growth, remove them to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUT-DOORS.—Plant from October to January, at a depth of three inches, and two inches apart, in a prepared light loamy soil, thoroughly drained, the bed raised six inches above the general level, with a due south aspect. Should the earlier plantings make foliage in autumn, slight protection must be given especially during severe frost. The later plantings will flower after the earlier ones, therefore select a situation for them where the sun's rays will be somewhat broken, and thus the blooming period will be prolonged. The gorgeous beauty of these flowers amply rewards the little extra care they require to ensure success.

IXIAS.

The Ixia is a slender graceful growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays, present a picture of gorgeous beauty.

THE RANUNCULUS.

CULTURE.—Plant the **Turban Ranunculus** from October to March, and the **Persian** varieties from January to April. When the soil works kindly, and the day is dry, draw drills two inches deep, and five or six inches apart; at the bottom of the drill sprinkle a little sand, press the tubers firmly into the soil, *claws downwards*, and cover with sand, then with soil, keeping the crown of the tuber two inches under the surface. During severe weather, cover the early plantings with dry litter, leaves, or old tan, and this remove before the foliage in Spring gets injured. In April and May, during dry weather, water the beds freely, two or three times a week if necessary; and when the flower-buds appear, water daily if required, and continue doing so while the plants are blooming; this will insure fine flowers. *In watering, wet the foliage as little as possible.*

DOUBLE PERSIAN RANUNCULUS for Beds, Borders, and Masses.

The named varieties offered below in Collections have been selected on account of their *large flowers.*

THE ANEMONE, OR WINDFLOWER.

For brilliancy of colour few flowers can compare with the **Anemone**, which in Spring produces its masses of double or single blossoms in an endless variety of shades, *scarlets, crimsons, roses, blushes, lilacs, blues, purples*, and *whites*, all of which for cutting are valuable, lasting long in water. For beds, edgings, and masses, it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the Anemone. Plant in succession A. coronaria varieties from October to May, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. *The plantings for Summer and Autumn-flowering, should be in a situation where the ground is moist, and is shaded from the sun's rays from after* 10 *or* 11 *a.m.*

NEW DOUBLE POPPY ANEMONES FOR BEDS AND MASSES (A. coronaria varieties).

The flowers of the **Double Poppy Anemone** resemble a semi-double Hollyhock, and are extremely handsome. When planted from October to December, they flower in succession during the early Spring months, and those planted from January to April flower in succession from April to July. *Each amateur should plant Autumn and Spring, and find out which is best for his soil and climate.*

[*Barr and Son,*

NEW VARIETIES OF POPPY ANEMONES (A. Coronaria). *Plant Autumn and Spring.*

1041 Anemone, "Glory of the South" (nsw), this is a grand new Anemone; the flowers are single and very large, with broad rich brilliant scarlet petals and a rich blue-black central boss. A flower of great beauty and fine substance, per 100, 10/6; per doz. 1/6.

1042 Anemone, "St. Brigid," *a very lovely strain of Anemones. The flowers are very large, mostly semi-double, and of the most brilliant and varied shades of colour. All flowers show a handsome blue-black central boss, have a graceful habit, and are remarkably free-flowering,* per 100, 10/6; per doz. 1/6.

1043 Anemone, "St. Brigid," Large Crimson-scarlet, strikingly beautiful semi-double flowers, per 100, 6/6; per doz. 1/3.

ANEMONE STELLATA (the Starry Windflower of the Riviera).

These Starry-flowersd Single Anemones are remarkable for variety of brilliant colours, elegant flowers, and graceful foliage. A light well-drained soil and warm sheltered situation suit them best; on rockwork they look charming. They also make good pot-plants with six roots in a pot. *Plant September, October and November.*

1046	**"Scarlet Gem,"** *brilliant crimson-scarlet flowers with silvery centre, very showy*	8	6	1	3

ANEMONE FULGENS (the Beautiful Scarlet Windflower of the Riviera).

Anemone fulgens is the most brilliant and graceful of all Winter and Spring-flowering Anemones. The rich *dazzling scarlet* flowers, and light elegant growth, render it the most attractive scarlet flower of Spring. It is invaluable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early in Autumn, flowers, weather permitting, may be gathered from Christmas; its hardiness is beyond all question, so that roots may be safely planted any month from August to May. *The plantings made April and May should be in a situation where in summer the ground is moist, and the sun's rays do not fall on them after* 10 *or* 11 *a.m.* (Figured in *The Garden*, 1877.)

VARIOUS BEAUTIFUL ANEMONES.

Anemone apennina, the blue Mountain Windflower, forms a dense cushion of rich blue, and is one of the loveliest dwarf Spring flowers. *A. blanda* resembles *A. apennina*, but flowers a month earlier. The varieties of Anemone nemorosa literally carpet the ground with their charming flowers. *A. nemorosa Robinsoniana* is remarkably beautiful, and *Anemone nemorosa bracteata* may be called "the Jack in the Green" of Anemones, the white petals resting on a profusion of green bracts. *A. pulsatilla* flowers spring and autumn All the above-named species are charming on rockwork. *A. rivularis* is a very ornamental spring-flowering variety. As pot-plants these Anemones are very charming. *A. japonica*, white, rose and red, are the most decorative of Autumn-flowering herbaceous plants. *Mr. William Robinson in his paper at the Conference on Hardy Flowers described the fine effect of Anemone apennina when planted in meadows or near to large elm trees (the flowers and foliage passing away before haymaking time); Mr. Robinson also recommends that Anemone Japonica be planted in rough places outside the garden.*

CYCLAMEN.

GREENHOUSE CYCLAMEN (C. persicum).

From November to March, **Cyclamen persicum** is brought in large quantities to Covent Garden Market, many of the specimens having upwards of two hundred flowers. It is an indispensable plant for indoor decoration, and few flowers are more highly prized for button-hole bouquets, ladies' dresses, and finger-glasses. It may be cultivated in a cool greenhouse, or cold frame, with a little winter protection; but it is in a temperature of 45° to 60° the Covent Garden growers produce their fine plants, and these are mostly from seed sown in November, and not allowed to go to rest till they have flowered the following winter.

1075 Cyclamen persicum grandiflorum, *fine large-flowered varieties for Greenhouse decoration,* per doz., according to size of plants, 15*s.*, 21*s.*, 25*s.*, and 30*s.*; each, 1*s.* 6*d.*, 2*s.*, 2*s.* 6*d.*, 3*s.* 6*d.*, and 5*s.* 6*d.* (**Seed** 2*s.* 6*d.* *and* 3*s.* 6*d.* *per packet.*)

King Street, Covent Garden, 1894.]

CYCLAMEN—*continued.*

HARDY CYCLAMEN SPECIES, *for Rockwork out-of-doors.*

These **Hardy Cyclamen** require perfect drainage, and shelter from the cutting winds of March and April, and the hot rays of the Summer sun; at the bottom of old walls facing north and on rockwork they are very beautiful; or nestling in the grass, near the roots and under the shelter of old trees, the effect is most charming. *C. Europæum* is fragrant, and commences flowering in July. *C. Neapolitanum, Græcum,* and *Africanum,* flower in Autumn, and have large beautiful marbled leaves; these again are succeeded by the winter-flowering varieties—*Ibericum* and *Coum,* which bloom from December to March; *Repandum* closes the Cyclamen season in April. *Repandum* and *Africanum* should be planted in warm protected situations on rockwork, and covered with leaves or bracken till March.

The **Cyclamen Neapolitan varieties** are perfectly hardy, and have large and beautiful variegated leaves; they are unusually decorative throughout Autumn and Spring, and might well be used for Winter beds, intermingled with Scillas, Chionodoxas, Leucojums, Narcissus nanus, Snowdrops, Muscaris, &c.

☞ *These hardy Cyclamen are kept in pots ready for despatch at all seasons.*

HYACINTHUS CANDICANS.

THE GREAT SNOW-WHITE SUMMER-FLOWERING HYACINTH.

1097 **Hyacinthus Candicans** attains a height of 3 to 6 feet, according to soil and situation, and is surmounted with 20 to 50 graceful pendant pure white bell-shaped flowers, equally decorative for the flower border or the conservatory. Figured in *The Garden,* 1881.
Good Flowering bulbs, p. 100, 6/6; p. doz. 1/3. **Larger selected bulbs,** p. 100, 8/6; p. doz. 1/6

GLADIOLI.

EARLY-FLOWERING HARDY GLADIOLI, *for Autumn and Winter-Planting.*

Bulbs ready from October.

These beautiful **Early-flowering Gladioli** are greatly prized as cut flowers from May to July for filling vases, &c., and on this account, as also for the fine effect they produce in the flower garden, they should be largely planted. G. Colvillei, "**The Bride,**" is exceptionally valuable, and is extensively grown in pots to cut during April, May and June for Covent Garden Market. All the Gladioli we have enumerated as early-flowering may be grown in pots for indoor decoration.

CULTURE OUT-DOORS.—A sunny situation is preferred. Trench the ground, working in plenty of rotten manure in the underspit; plant the varieties marked with an * from October to December, and the others from November till February, at a depth of six inches. If the summer is dry and the weather hot, a good soaking of water or liquid manure twice a week greatly benefits the growing plants. *When planted in autumn, the beds should be lightly covered with fern or cocoa-fibre.*

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a five or six-inch pot, and plunge in ashes in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried in ashes out of doors, as recommended for the Hyacinth, and there allowed to remain undisturbed till ready to remove indoors. It is customary with some to plant several bulbs close together in the open border, and when the flower begins to colour, lift without breaking the ball, pot, and place indoors. So treated, the flowers expand as if the bulbs had not been disturbed.

BEAUTIFUL NEW HYBRID BUTTERFLY GLADIOLI (Lemoine's).

The flowers of this new race of Gladioli are entirely distinct in form and markings from the Gandavensis varieties; the colours are very beautiful, and the large blotches on the lower petals render the flowers most attractive. They are vigorous growing and hardy, and bloom during the period between the early-flowering and late-flowering Gladioli.

1143 **Splendid unnamed Seedlings, mixed,** *all strong-flowering bulbs*; these are sure to please, giving the greatest variety of colours, with most beautiful markings, per 100, 12*s.* 6*d.*, per doz. 2*s.*

A FEW RARE AND BEAUTIFUL SPECIES OF CAPE GLADIOLI.

These species of Gladiolus, we feel sure, will be acceptable to lovers of hardy bulbous plants. *Alatus, Galeatus, Gracilis, Hirsutus, Præcox,* and *Ringens* are not quite hardy except in the southern parts of England, the west coast of Scotland, and in Ireland; in less favoured parts than these they should be grown under a south wall, or protected in winter with a frame or handlight, or cultivated in pots under glass. The different species flower from May to June, except where otherwise stated. *Psittacinus* and *Sulphureus* plant in spring, or, if planted in autumn, protect with fern or cocoa fibre.

1143½ **Collection of One each of 20 curious and beautiful species of Gladioli, including the following,** 12*s.*

AMARYLLIS.

Under this heading are arranged plants, differing very much in character, and requiring separate treatment.

THE GUERNSEY AND BELLADONNA LILIES.

☞ The **Guernsey** *and* **Belladonna Lilies** *are received by us in bud early in September.* The supply being always uncertain, orders for them should be given as soon as possible after the 1st, and not later than the 15th September. *When executing orders for the Guernsey and Belladonna Lilies, we carefully examine the flower-buds, and send only such bulbs as give promise of good flowers.* Delay in transit, neglecting to plant immediately, or, perhaps, an undeveloped defect in the flower bud, often leads to partial failure, and as we cannot hold ourselves responsible for such contingencies, purchasers are recommended to buy an extra quantity, as the roots are so very inexpensive.

CULTURE.—Immediately the **Guernsey and Belladonna Lilies** are received, pot them in light soil, prepared cocoa-fibre or moss, and give water liberally. Bulbs of Guernsey Lilies, purchased after the flowering season, should be potted and grown under glass. Bulbs of Belladonna Lilies may be planted under a south wall at a depth of one foot, and when established will flower annually.

		each—s.	d.
1152	**Guernsey Lily (Nerine sarniensis),** *flowers brilliant scarlet, having the appearance, when seen with the sun's rays on them, of being spangled with gold* ..... per doz. 10/6	1	0
1153	**Belladonna Lily (Amaryllis belladonna),** *produces umbels of large white flowers, shaded and tipped deep rose* ..... per doz. 7/6	0	9

HARDY AMARYLLIS.

Amaryllis Candida (*Zephyranthes*) "The Flower of the West Wind," throws up in autumn a profusion of white Crocus-like flowers. **Lutea** (*Sternbergia*), "The Lily of the Field," is also a good hardy bulb, for edgings and groups, its rich golden-yellow Crocus-like flowers, expanding in Autumn from the midst of a bright fresh green foliage.

		per doz.

1155	**Lutea** (*Sternbergia*), *bright golden-yellow crocus-like flowers, produced in Autumn,* ... per 100, 12/6	1	9

VALLOTA PURPUREA, AND THE JACOBEA LILIES.

Vallota purpurea, known also as **"The Scarborough Lily,"** is most valuable as an Autumn-flowering plant, and as a cut flower for filling vases. We recommend it to be planted out of doors in May, and when in bud potted up for conservatory decoration. **Amaryllis formosissima,** the Jacobea Lily and its variety **Glauca,** are quaintly-shaped and beautiful flowers ; the bulbs force easily, and may be potted in succession for Spring decoration. In April the dry bulbs can be planted out in flower beds or borders for Summer-flowering.

		each s.	d.

CHOICE GREENHOUSE AMARYLLIS (HIPPEASTRUM).

These are grand plants in the conservatory, and to cut for table bouquets and vases. With management, these magnificent Amaryllis may be had in bloom for many months. The **unnamed seedlings** quoted, we specially recommend ; they are from the best collection in Europe, and cannot fail to please, as regards variety of beautiful colours and large size of flowers. *The bulbs we send out are large and full grown, ready to bloom in Spring.*

CULTURE.—Immediately after potting, place in a moist warm temperature if at command, and, if convenient, plunge the pot to the rim in a gentle, steady, moist bottom heat ; thus treated, a vigorous leaf growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat these Amaryllis do well in any ordinary greenhouse or sunny sitting-room window. Dr. Bonavia recommends that the offsets should not be removed, but kept with the parent plant, till from six to a dozen spikes of bloom be had from the same pot ; he also recommends that on the South Coast of England and in many parts of Ireland and the West Coast of Scotland, these beautiful Amaryllises should be grown outside, under south walls, planted one foot beneath the surface, and protected with litter or leaves during winter.

1159 **CHOICE UNNAMED SEEDLING AMARYLLIS, Flowering Bulbs,** *purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty.*

THE LILIUM.

THE LILY is matchless amongst hardy plants for variety of colour, chasteness, and beauty of form. It is an important plant to associate in beds with Rhododendrons and Pæonies, and in borders amongst Herbaceous plants. *As a pot-plant the Lily is a general favourite.* **We enumerate here only a few popular showy kinds,** but a fuller list, with cultural notes, will be found in our *Daffodil Catalogue,* and a complete descriptive *Lily* list may be had on application.

TIGRIDIA (Tiger-spotted Flowers).

No flower is more gorgeously coloured or more beautiful than the **Tigridia.** **The bulbs** *are supplied from December to May, and may be planted out-doors March, April, or May. For pot-culture, plant earlier, and as soon as potted plunge in a cold frame and withhold water till the foliage appears, and then give sparingly at first. Plantings out-of-doors may be made as late as June, and these, if lifted and potted in September, will flower under glass late in Autumn.* (Beautiful Coloured Plate of **T. alba**, price 6*d.*)

per doz.—s. d.

1203 ,, ,, ,, **rosea** (new), *beautiful soft rose, large flowers*..... 3 6

☞ For two beautiful little rare species of Tigridias, see Novelties, page 3.

TUBEROSES.

CULTURAL TREATMENT FOR FORCED FLOWERS.—*The growers for Covent Garden pot the Tuberose singly in 5 or 6-inch pots, and plunge in moist bottom heat, withholding water till the foliage appears, then giving it freely, growing on in a house with a high temperature and a moist atmosphere, till the flower buds develope; at this stage, if the plants are intended for the conservatory or sitting-room, remove to a greenhouse temperature. The bulbs for early flowering pot as soon as they can be procured, and plunge the pots in a temperature of about 60 degrees. The bulbs for succession keep dry or pot at once, to make root growth; in either case the temperature should not be below 50 degrees or the bulbs will suffer.*

each s. d.

PART II.

DESCRIPTIVE LIST, ALPHABETICALLY ARRANGED, OF VARIOUS BULBS AND TUBEROUS-ROOTED PLANTS.

*Those marked thus * ripen late and will be ready to send out from the middle of October to March. All other bulbs, etc., are ready for despatch from 1st September. Orders which embrace later ripening bulbs, etc., will be executed in two parts, carrying forward those not ready for delivery, till they are safe to move.*

☞ *The height of the plants is given in feet and inches.* **In most cases cultural notes are added.**

		each—s.	d.
1207	*Abobra viridiflora, *an elegant hardy summer climber, with miniature scarlet fruits*	0	9
1208	*Achimenes, 25 beautiful varieties, 1 root each, 10/6 ; 3 roots each, 25 varieties, 30/-		
1209	* ,, 12 beautiful varieties, 1 root each, 4/6 ; 3 roots each, 12 varieties, 12/6		
1210	Agapanthus umbellatus (Blue African Lily), *flowers in handsome umbels, half-hardy*.....p. doz. 7/6	0	9
1211	,, ,, maximus, *same colour as above, but with larger flowers, half-hardy*	1	3
1212	,, ,, albus (White African Lily), *flowers in handsome umbels, half-hardy*	1	6
1213	,, ,, fol. variegatis (Variegated African Lily), *with silver-margined foliage* ...	2	6
1214	,, ,, Mooreanus, *small blue flowers in umbels, graceful* .....per doz. 7*s.* 6*d.*	0	9

The Agapanthus are fine plants for indoor decoration, and in tubs on terrace walks and lawns, few plants look more noble ; when planted out by streams, lakes, and ponds, it may be questioned if any plants are so effective.

1215	Albuca canaliculata, *bearing handsome trusses of golden flowers, very fragrant*, 1½ ft.	2	6
1216	,, Nelsoni (new and rare), *produces large handsome spikes of white almond-scented flowers, with brown stripe. Under glass it flowers pure white*, 3 to 5 ft. .....per doz. 15/	1	6

The Albucas are decorative Cape bulbs, and may be grown in the greenhouse, or planted out under a south wall. Roots supplied during September and October only.

1220	,, azureum, *handsome intense blue flowers, quite hardy*, 1½ ft. .....per doz. 7*s.* 6*d.*	0	9
1221	,, cyansum (*new*), *pretty deep blue flowers in clusters*, ht. 4 to 6 in., *established in pots*	1	6
1222	,, descendens, *large dark red-purple flower heads, in compact umbels*, 2 ft. ...per doz. 1*s.* 6*d.*	0	3
1223	,, Karataviense, *remarkable for its very large broad glaucous-green handsome foliage*	1	6
1224	,, neapolitanum, *white flowers, much used in bouquets*, 15 in.....per 100, 3/6 ; per doz. 8*d.*	...	
1225	,, Ostrowskianum (*syn.* oreophyllum), *a beautiful new species from Asia Minor, with large heads of beautiful rose-coloured flowers* ....per doz. 2*s.* 6*d.*	0	3
1226	,, pedemontanum (*syn.* narcissiflorum), *rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct*, ¾ ft.	1	6
1227	,, pulchellum, *graceful heads of charming bright rosy purple flowers, in July*, ¾ ft. per doz. 4/6	0	6
1228	,, ,, flavum, *small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering*, ¾ ft. .....per doz. 4*s.* 6*d.*	0	6
1229	,, Rosenbachianum, *large purple-rose flowers*, 1½ ft.	1	6
1230	,, roseum, *most pleasing rosy puce colour*, 1 ft. .....per doz. 2*s.* 6*d.*	0	3
1231	,, triquetrum, *white, striped green, graceful drooping umbels, pretty*, 1 ft. ... ,, 1*s.* 6*d.*	0	3

The Alliums are a most decorative and showy family of hardy spring and summer-flowering bulbs, valuable alike for borders or rockwork. *A. neapolitanum* is easily forced, and the cut blooms are extensively used for vases and table bouquets.

1232	*Alstromeria aurantiaca, *flowers rich orange, spotted carmine, very showy*, 3ft., p. 100, 18/; p. doz. 2/6	0	3
1233	* ,, chilensis hybrida, *beautiful shades of rose, crimson, orange, yellow, buff, and blush, with yellow and crimson markings, valuable as cut flowers*.....p. 100, 15/ ; p. doz. 2/3	0	3
1234	* ,, pelegrina alba, *white, very chaste and beautiful flowers*..... } *Plant on a warm south*	1	6
1235	* ,, ,, rosea, *rose-coloured flowers, beautifully spotted* ... } *border, or under glass*	0	9
1236	* ,, psittacina, *bright crimson flowers splashed green and mahogany*, 3 ft.....per doz. 2*s.* 6*d.*	0	3
1237	* ,, pulcbra (tricolor), *white and yellow flowers, striped and blotched crimson*...p. doz. 4*s.* 6*d.*	0	6
1238	* ,, in fine mixture .....per 100, 12*s.* 6*d.* ; per doz. 2*s.*	...	

These beautiful **Alstrœmerias**, or **Peruvian Lilies**, are very easy to cultivate, and produce in summer abundance of valuable cut flowers, which last long in water. Their showy and attractive flowers render them useful border plants. Plant 6 inches deep, and by preference close to a wall, protecting, the first winter, with leaves or litter. **A. pelegrina** protect every winter.

1239	*Amorphophallus Rivieri (Umbrella Arum), *a very handsome plant, with large palmate leaves, 2 to 3 ft. in diameter, on a white spotted stem ; plant out of doors in April or pot up earlier*.....	2	6
1240	*Anomatheca cruenta, *a charming dwarf pot-plant, with small bright scarlet, crimson-blotched flowers; elegant for edgings out of doors*, ¾ ft.; *plant in Spring* .....per doz. 2*s.* 6*d.*	0	3
1241	*Antholyza coccinea, *a very beautiful bulbous plant, bearing in summer handsome spikes of gorgeous vermilion-scarlet flowers on a reddish-brown stem* .....per doz. 2*s.* 6*d.*	0	3
1242	*Apios tuberosa, *a rapid growing elegant hardy deciduous climber, for arbours, trellises, &c.* p. doz. 3/6	0	4
1243	Arum cornutum, *red flowers, spotted black, stem curiously marbled, handsome foliage*...per doz. 4*s.* 6*d.*	0	6
1244	,, crinitum, *flowers reddish brown, and of immense size, stem marbled*.....	1	0
1245	,, dracunculus, *large purple-red and black-blue flowers, marbled stem, very handsome* p. doz. 4/6	0	6
1246	,, italicum, *flowers greenish white, followed by spikes of scarlet berries, leaves spotted*	0	4
1247	,, palæstinum (*syn.* sanctum), The Black Calla, *flowers velvety black inside, olive-coloured outside, sweet-scented, handsome ornamental foliage, spring-flowering* .....per doz. 10/6	1	0

The Arums are very interesting and more or less handsome plants. **Dracunculus** and **Italicum** are quite hardy ; the other species require winter protection with ashes, leaves, litter, or cocoa fibre, and should be grown by preference on a sunny border, in light loamy soil.

These are the Butterfly Tulips or Mariposa Liliee of California, and possess such delicacy and brilliancy of colour that the most unobservant are struck with their characteristic beauty. They bloom from June to July; height 1 ft. The bulbs should be lifted when done flowering, kept dry, and be planted late in autumn. They like a sunny dry situation, such as the foot of a south wall, or the sunny part of a rockery, or they may be grown in pots. We offer only **strong home-grown bulbs.**

1358 ,, **Nuttallianum**, *a very rare species, with golden-yellow flowers, and dark green foliage* — 3 6

In spring there is no prettier sight than a mass or edging of **Dog's-Tooth Violets**, with their beautiful variegated foliage and graceful Cyclamen-like flowers, ranging in colour from deep purple to the purest white. The large handsome American varieties of **Grandiflorum** are strongly recommended; they prefer a partially shaded and moist situation. Mr. William Robinson, referring to the **Dog's-Tooth Violets (E. dens-canis)**, in his paper at the Conference on Hardy Flowers, says, "This beautiful and delicate-looking plant surprises me at the free way it grows in grass where I have planted it." Mr. R. has unconsciously imitated nature. In the high Pyrenees it abounds in the grass.

[*Barr and Son,*

each—s. d.

1359 **Eucharis amazonica**, *the snow-white flowers of this handsome stove-plant are deliciously fragrant, much prized for bouquets and ladies' hair*, 1½ ft. Pots of strong established roots, per pot 5s. 6d. & 7 6

1423 ,, **tricolor**, *scarlet, yellow and green*, 1 ft. ....per doz. 5s. 6d. 0 6

The Lachenalias are very beautiful plants, with curiously spotted leaves and handsome flower spikes, early in Spring. They should be potted early in a compost of loam, sweet leaf soil, and sand, placed in a greenhouse or frame, and never allowed to suffer for want of water. See Plate in "The Garden," 1880.

1424 ***Littonia modesta**, *an elegant greenhouse climber, yielding abundance of slender deep golden-coloured bell-shaped flowers. In warm situations it may be planted out-doors in April* 2 6

1425 **Lycoris aurea**, *golden pendant flowers, October-flowering*, 1 ft .... } *Greenhouse bulbs of great* { 7 6

1426 ,, **radiata**, *rosy carmine flowers, June-flowering*, 1½ ft. ... } *beauty.* { 7 6

1427 ***Malvastrum Gilliesii (Modiola)**, *figured in "The Garden" of 28th Jan.*, 1882. *This charming hardy rock-plant is profusely covered with crimson-purple flowers all the summer*..... 0 9

Methonica Planti and Superba, etc. *See* **Gloriosa.**

1428 ***Milla biflora**, *pure white, large flowers of great substance, should be grown in pots under glass, or kept dry, and planted out in March in a well-drained and sunny situation*, per doz. 5s. 6d. 0 6

1429 ,, **hyacinthina lactea**, *pure white, an exceedingly useful plant for cut flowers*, 2 ft. ,, 5s. 6d. 0 6

1430 ,, **laxa**, *large rich Tyrian purple flowers*, 1 ft.... ..... ,, 2s. 6d. 0 3

1431 ,, **longipes**, *graceful white flowers borne in umbels* ..... ,, 5s. 6d. 0 6

1432 ,, **uniflora**, *white, shaded porcelain*, ½ ft. .....per 100, 2s. 6d. ; per doz. 6d. ...

1433 ,, ,, **lilacina**, *porcelain, striped violet*, ½ ft. ..... ,, 2s. 6d. ; ,, 6d. ...

The Milla (Triteleia) is a family of varied character ; **Uniflora**, which produces masses of beautiful dwarf flowers in Spring, is very effective on rockwork, etc., also as an edging, and in small beds or naturalized in grass ; **M. laxa** produces in Summer large umbels of lovely coloured flowers ; **M. hyacinthina lactea** is very decorative ; all are perfectly hardy.

Modiola geranioides. *See* **Malvastrum Gilliesii.**

1434 ***Montbretia Pottsii**, *graceful branched spikes of small crimson-scarlet, Gladiolus-like flowers, remarkably showy*, 2 ft. *Figured in "The Garden,"* 1880 per. 100, 5s. 6d ; per doz. 10d. ...

1435 ,, ,, **grandiflora**, *a handsome large-flowered form of M. Pottsii* ...per doz. 4s. 6d. 0 6

1436 * ,, **crocosmæflora**, *elegant branched spikes of handsome showy brilliant orange-red shaded yellow flowers*, 2½ ft. .....per 100, 6s. 6d.; per doz. 1s. ...

1437 * ,, ,, **aurea**, *large golden-yellow flowers* ..... ,, 7s. 6d. 0 9

1438 * ,, ,, **"Bouquet Parfait,"** *deep yellow, shaded vermilion* ... ,, 4s. 6d. 0 6

1439 * ,, ,, **"Étoile de Feu,"** *large open flowers, rich vermilion-red, with yellow centre* .....per doz. 3s. 6d. 0 4

1440 * ,, ,, **"Golden Sheaf,"** *handsome spikes of beautiful deep golden-yellow flowers ; good dwarf habit* .....per doz. 7s. 6d. 0 9

1441 * ,, ,, **"Phare,"** *orange-scarlet and golden-yellow, showy*..... ,, 4s. 6d. 0 6

1442 * ,, ,, **pyramidalis**, *pretty apricot colour, compact and erect growth* ,, 7s. 6d. 0 9

Montbretias rank amongst our most decorative bulbous plants in summer. Their graceful spikes of showy flowers are valuable for cutting and last long in water They thrive out-doors in a sandy loam, but require protection in winter.

1443 ***Nemastylis Pringlii**, *very beautiful star-shaped azure-blue flowers two inches across, in June*, ½ft. *Hardy on rockwork in warm spots. Keep dry during winter, and plant early in spring* 2 6

1444 **Nerine curvifolia Fothergilli**, *large umbels of handsome flowers, deep vermilion-scarlet*, 1 ft..... 2 6

,, **sarniensis.** *See* **Guernsey Lily**, *page* 25.

1445 ,, ,, **corusca**, *bright dazzling-scarlet, with 20 to 25 flowers in a cluster*, 1 ft. 2 6

1446 ,, ,, **venusta**, *umbels of bright scarlet flowers in September, very free* 2 6

1447 ,, **undulata (crispa)**, *rose-coloured flowers, petals elegantly curled, a gem*, ¾ ft. 2 6

1449 ,, ,, ... **extra large roots**, 3/6 0 4

1450 ,, **aureum**, *rich apricot-orange, a beautiful and rare species*, 1 ft. 1 3

1451 ,, **montanum**, *a pretty little dwarf species, with umbels of starry white flowers*, 3in. per 100, 18s. ; per doz. 2s. 3d. 0 3

1452 ,, **nutans**, *elegant spikes of silvery grey flowers, shaded on outside pale sea-green, beautiful ; valuable for cutting*, 1 ft. .....per 100, 5s. 6d. ; per doz. 10d. ...

1453 ,, **prosandrum**, *graceful spikes of silvery white and green flowers*, ¾ ft. ,, 4s. 6d. 0 6

1454 ,, **pyramidale**, *large spikes of beautiful snowy white flowers*, 2 ft. ..... ,, 5s. 6d. 0 6

1455 ,, **umbellatum splendens**, *a large handsome form of the* old Star of Bethlehem, *bearing umbels of pure white starry flowers, valuable for masses, edgings, and naturalization* .....per 100, 3s. 6d.; per doz. 8d. ...

1456 ,, **unifolium**, *a distinct dwarf slender growing species, with white flowers* 0 9

Ornithogalums (*Star of Bethlehem*) are fine hardy bulbs, flowering in Spring and early Summer. **Arabicum** and **aureum** should either be grown in pots or planted in a warm situation close to a south wall, at a depth of 6 inches. **Nutans, Pyramidale, Pyrenaicum**, and **Umbellatum**, in grass are fine plants for naturalizing. *O. nutans* and *O. umbellatum* are natives of England.

BARR'S GARDEN REQUISITES.

APHIS BRUSH, 1s. 6d. each.
BOUQUET STALK WIRE, 7 inch lengths, in bundles of 1 lb., finest, 1s. 6d.; second, 1s. 4d.; third, 1s. 2d; thickest, 1s.
BOUQUET STEEL WIRE, 7 in. lengths, for wiring Camellias, Roses, Gardenias, &c., in bundles of 1 lb., 1s. 6d.
BOUQUET BINDING WIRE, per reel, 6d.; Silvered Binding Wire, per reel, 9d.
BOUQUET GUM, for fixing the petals of Geraniums, Primulas, &c., per bottle, 1s. and 2s.
BASS MATS, best Archangel, per doz., 18s.; each 1s. 9d.
BASS RAPHIA, a light material for tying, per lb., 1s. 3d.; per 14 lbs. 10s. 6d.; specimen bundles, 6d. and 1s.
FERTILIZING MOSS, in original bags, for plant culture, 2s. 6d.
GLOVES, strong, for pruning, best quality 2/6 per pair.
,, Gent.'s, for pruning, best quality 3/ & 4/6 per pair.
GLOVES, Ladies, for gardening, best quality, 2s. 6d. and 3s. 6d. per pair.
HYACINTH GLASSES, Plain, in six colours, per doz., 5s. 6d.
,, ,, in Fancy Designs, per doz., 7s. 6d. to 24s.
KNIVES, SAYNOR'S, best quality, pruning, 2s., 2s. 6d., 3s., 3s. 6d., 4s., and 4s. 6d. each.
,, ,, ,, ,, budding, 3s., 3s. 6d., and 4s. 6d. each.
LABELS, WOODEN, for pots and borders, painted; in bundles of 100, 3½ inches, 8d.; 4¾ inches, 10d.; 5½ inches, 1s.; 6½ inches, 1s. 3d.; 7½ inches, 1s. 6d.; 9 inches, 2s.

HOW TO PREVENT OR CURE POTATO DISEASE AND MILDEW

ON VINES, TOMATOES, HOPS, FRUIT TREES, ROSES, ETC.

USE

TAIT AND BUCHANAN'S ANTI-BLIGHT AND MILDEW POWDER, THE BEST FUNGICIDE YET DISCOVERED.

Experience has proved this to be the most efficacious antidote in use for the cure or prevention of mildew. It has been tried with equal success on *Potatoes, Vines, Tomatoes, Hops, Cucumbers, Peas, Roses, Fruit Trees and Bushes, also on Chrysanthemums, Heaths,* and other indoor plants.

Fuller particulars on application. Prices, 1 lb., 1*s*.; 3 lbs., 2*s*. 9*d*.; 7 lbs., 5*s*. 6*d*.; 14 lbs., 10*s*. 6*d*.; 28 lbs., 18*s*.; 56 lbs. 35*s*.

MALBEC BELLOWS, the best and quickest powder distributor, price 7*s*. 6*d*. each.
,, ,, **IMPROVED,** with self-acting interior agitator, 8*s*. 6*d*. each.

WATSON'S WEED DESTROYING LAWN SAND.

This Preparation has the remarkable property of destroying Daisies, Ribbed Grass, Plantains, Dandelions, and other Weeds which have bulbous or tap roots; and at the same time of improving the Grass, by enriching the colour and thickening the sward. It may be applied at all seasons, but an annual application in Spring not only destroys the Seedling Weeds, but, by invigorating the grass, prevents, to some extent, the burning up during hot dry weather. *The "Lawn Sand" is clean, easy of application, and inodorous.* Circular with full directions and with testimonials, on application. Price for Sample Canister, 2*s*. 6*d*. and 5*s*. 6*d*.; per ¼ cwt., 9*s*. 6*d*.; ½ cwt., 18*s*.; 1 cwt., 34*s*.

TO HAVE DRY AND WARM FEET USE GISHURSTINE AS A DUBBING

On the Soles and Uppers of Boots and Shoes.

Gishurstine is sold in Tin Boxes, 6*d*. and 1*s*.; by post 9*d*. and 1*s*. 3*d*.
Gishurstine, specially prepared for hot climates, 9*d*. and 1*s*. 6*d*. per tin.

Directions for Use.—Warm the Boots, then rub in Gishurstine thoroughly all over upper Leathers, Welts, and Soles. This may be repeated once or twice a month, or oftener. One application makes leather soft and boots comfortable. Gishurstined boots take a good polish with blacking. Gishurstine has no unpleasant smell, and is otherwise an improvement on old-fashioned dubbing.

BARR'S PREPARED CHARCOAL AND COCOA FIBRE.

For growing Ferns in Plant Cases, and Bulbs in Jardinets, Glasses, &c.

Fill the Hyacinth glasses with the preparation, and then add water till no more can be absorbed. In the glass, place the bulb so as to rest the base on the preparation, then tie it down with brown paper as you would a jam-pot, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remark applies to bulbs grown in vases; they must be kept in place till they have rooted. **5s. per bush.; 1s. 6d. per peck.**

BARR & SON, 12 & 13 KING STREET, COVENT GARDEN, LONDON.

each—s. d.

1457 **Oxalis cernua var. bermudiana,** The Bermuda Buttercup Oxalis, *a charming winter-flowering bulb for indoor decoration, producing a luxuriance of graceful bright yellow flowers for some weeks.* After potting keep in a dark cool position for a few weeks to root well, and then remove to a sunny window, or greenhouse .....per doz. 4s. 6d. 0 6
